PURPOSE:

To mobilize support for SDI.

BACKGROUND:

Since the President's March 1983 speech on SDI, the public image of the research program has been diminished by an organized opposition. Among many of the criticisms of opponents of the SDI is the issue that the program has divided opinions among our Allies

regarding their participation in the research. This meeting will afford the Administration a prime opportunity to bolster the public image of SDI as the group consists of members who are supportive of the program and aware of the benefits to such nations as Israel - one of three nations who have signed a formal agreement to participate in SDI.
